

## RESEARCH POSITIONS FOR YOUNG SCIENTISTS

Condensed Matter Physics Center (IFIMAC) invites applications for 4-years research positions for young scientists aiming to start and lead an independent research group.

IFIMAC conducts wide-scope research in a variety of fields in Condensed Matter Physics: Advanced Materials, Soft Condensed Matter and Biophysics, Nanophysics, First Principles Simulations and Modeling, and Nano and Quantum Optics. More information on IFIMAC research can be found in its webpage: [www.ifimac.uam.es](http://www.ifimac.uam.es).

We are looking for ambitious young scientists with an innovative research program at the forefront of any branch within Condensed Matter Physics. The scope of this opening is similar to that of the Ramón y Cajal grant scheme. We will also provide the position with research funds of up to 150 keuros for the whole period. Applications with programs addressing topics that complement IFIMAC existing core strengths are particularly welcome. Applicants are expected to hold an outstanding record of research achievements and publications in top-quality journals. The predominant criteria for appointment are potential for original contributions and major commitment to frontier research at the highest-international level.

Applicants are requested to send a statement of interests, a research plan, the full curriculum vitae, and the contact information for at least three references. All this information should be sent via e-mail to [ifimac@uam.es](mailto:ifimac@uam.es).

Deadline for applications: April 16<sup>th</sup> 2020.
